Volume Contents for Volume 49 (2001)

VOLUME CONTENTS

Planetary and Space Science
Volume 49

JANUARY

Ip, W.-H. — **Editorial, Welcome to the 21st Century of *Planetary and Space Science* 1**

Perozzi, E., Rossi, A., Valsecchi, G. B. — **Basic targeting strategies for rendezvous and flyby missions to the near-Earth asteroids 3**

Beech, M., Nikolova, S. — **The endurance lifetime of ice fragments in cometary streams 23**

Blanco, C., Riccioli, D., Cigna, M. — **Mutual events between Jupiter's satellites observed in Catania during the PHEMU97 campaign 31**

Callegari, Jr., N., Yokoyama, T. — **Some aspects of the dynamics of fictitious Earth's satellites 35**

Izakov, M.N. — **Turbulence and anomalous heat fluxes in the atmospheres of Mars and Venus 47**

Skorov, Yu. V., Markiewicz, W. J., Basilevsky, A. T., Keller, H. U. — **Stability of water ice under a porous nonvolatile layer: implications to the south polar layered deposits of Mars 59**

Le Mouélic, S., Langevin, Y. — **The olivine at the lunar crater Copernicus as seen by Clementine NIR data 65**

Rietmeijer, F.J.M. — **Identification of Fe-rich meteoric dust 71**

McKay, C.P., Coustenis, A., Samuelson, R.E., Lemmon, M.T., Lorenz, R.D., Cabane, M., Rannou, P., Drossart, P. — **Physical properties of the organic aerosols and clouds on Titan 79**

Sephton, M.A., Pillinger, C.T., Gilmour, I. — **Supercritical fluid extraction of the non-polar organic compounds in meteorites 101**

Singh, S.V., Lakhina, G.S. — **Generation of electron-acoustic waves in the magnetosphere 107**

Palumbo, G.G.C. — **Book reviews 115**

FEBRUARY

Kim, S. J., Lee, Y. S., Kim, Y. H. — **Spectroscopic studies of the atmospheres of giant planets, Titan, and comets 117**

Molina-Cuberos, G. J., Lammer, H., Stumptner, W., Schwingenschuh, K., Rucker, H. O., López-Moreno, J. J., Rodrigo, R., Tokano, T. — **Ionospheric layer induced by meteoric ionization in Titan's atmosphere 143**

Trotignon, J. G., Séran, H.-C., Béghin, C., Meyer-Vernet, N., Manning, R., Grard, R., Laakso, H. — **In situ observations of the ionized environment of Mars: the antenna impedance measurements experiment, AIM, proposed as part of the Mars advanced radar for subsurface and ionospheric sounding, MARSIS 155**

Muller, C., Moreau, D., Fonteyn, D., Bertaux, J. L., Korablev, O. — **SPICAM-light on Mars-Express as a monitor of surface UV radiation and atmospheric oxidants 165**

Moroz, V. I. — **Spectra and spacecraft 173**

Harloff, J., Arnold, G. **Near-infrared reflectance spectroscopy of bulk analog materials for planetary crust 191**

Zamlutti, C. J. **On the influence of the stress tensor and heat flow vector in collisional multispecies fluids 213**

Havnes, O., Li, F., Hartquist, T. W., Aslaksen, T., Brattli, A. **Mach cones in dusty plasmas in planetary rings and in laboratory experiments 223**

Book review

Flury, W. **Multiple gravity assist interplanetary trajectories 231**

MARCH/APRIL

Special Issue

MAGNETOSPHERES OF THE OUTER PLANETS (PART I)

Zarka, P., Prangé, R. **Introduction to the Special Issue: Magnetospheres of the Outer Planets (Part I) 233**

Walker, R.J., Ogino, T., Kivelson, M.G. **Magnetohydrodynamic simulations of the effects of the solar wind on the Jovian magnetosphere 237**

Meyer-Vernet, N. **Large scale structure of planetary environments: the importance of not being Maxwellian 247**

Bunce, E.J., Cowley, S.W.H. **Local time asymmetry of the equatorial current sheet in Jupiter's magnetosphere 261**

Maclennan, C.G., Lanzerotti, L.J., Lagg, A. **Hot plasma heavy ion abundance in the inner Jovian magnetosphere ($< 10\ R_j$) 275**

Krupp, N., Woch, J., Lagg, A., Roelof, E.C., Williams, D.J., Livi, S., Wilken, B. **Local time asymmetry of energetic ion anisotropies in the Jovian magnetosphere 283**

Russell, C.T., Blanco-Cano, X., Strangeway, R.J. **Ultra-low-frequency waves in the Jovian magnetosphere: causes and consequences 291**

Santos-Costa, D., Bourdarie, S.A. **Modeling the inner Jovian electron radiation belt including non-equatorial particles 303**

Roth, I., Ramaty, R. **High-latitude radiation and resonant enhancements of the Jovian synchrotron emissions 313**

Jurac, S., Johnson, R.E., Richardson, J.D., Paranicas, C. **Satellite sputtering in Saturn's magnetosphere 319**

Eviatar, A., Vasyliu$nas, V.M., Gurnett, D.A. **The ionosphere of Ganymede 327**

Kabin, K., Combi, M.R., Gombosi, T.I., DeZeeuw, D.L., Hansen, K.C., Powell, K.G. **Io's magnetospheric interaction: an MHD model with day-night asymmetry 337**

Kurth, W.S., Gurnett, D.A., Persoon, A.M., Roux, A., Bolton, S.J., Alexander, C.J. **The plasma wave environment of Europa 345**

Queinnec, J., Zarka, P. **Flux, power, energy and polarization of Jovian S-bursts 365**

Barrow, C.H., Lecacheux, A., MacDowall, R.J., Kaiser, M.L. **The Jovian HOM and bKOM radio emissions observed by Wind/WAVES and by Ulysses/URAP 377**

Menietti, J.D., Gurnett, D.A., Groene, J.B. **Narrow-band kilometric radio emission as observed by the Galileo plasma wave instrument 385**

Wykes, W.J., Chapman, S.C., Rowlands, G. **Enhanced phase space diffusion due to chaos in relativistic electron–whistler mode wave particle interactions with applications to Jupiter 395**

Prangé, R., Chagnon, G., Kivelson, M.G., Livengood, T.A., Kurth, W. **Temporal monitoring of Jupiter's auroral activity with IUE during the Galileo mission. Implications for magnetospheric processes 405**

APRIL

Jackson, A.A. **The capture of interstellar dust: the pure Poynting–Robertson case 417**

Kargl, G., Macher, W., Kömle, N.I., Thiel, M., Rohe, C., Ball, A.J. **Accelerometry measurements using the Rosetta Lander's anchoring harpoon: experimental set-up, data reduction and signal analysis 425**

Kossacki, K.J., Markiewicz, W.J., Keller, H.W. **Effect of surface roughness on ice distribution in the south subpolar region of Mars 437**

Lucchesi, D.M. **Reassessment of the error modelling of non-gravitational perturbations on LAGEOS II and their impact in the Lense–Thirring determination. Part I 447**

Sephton, M.A., Gilmour, I. **Pyrolysis–gas chromatography–isotope ratio mass spectrometry of macromolecular material in meteorites 465**

Moreno, R., Marten, A., Biraud, Y., Bézard, B., Lellouch, E., Paubert, G., Wild, W. **Jovian stratospheric temperature during the two months following the impacts of comet Shoemaker–Levy 9 473**

Pinori, S., Bellucci, G. **Imaging spectroscopy of selected regional dark mantle deposits of the Moon 487**

Defraigne, P., Dehant, V., Van Hoolst, T. **Steady-state convection in Mars' mantle 501**

Steinberg, J.-L. **The scientific career of a team leader 511**

Cabane, M., Coll, P., Rodier, C., Israel, G., Raulin, F., Sternberg, R., Niemann, H., Mahaffy, P., Jambon, A., Rannou, P. **In situ inorganic and organic analysis (Pyr/CD-GC/MS) of the Martian soil, on the Mars 2005 mission 523**

MAY

Tully, C., Johnson, R.E. **Low energy collisions between ground-state oxygen atoms 533**

Tokano, T., Molina-Cuberos, G.J., Lammer, H., Stumptner, W. **Modelling of thunderclouds and lightning generation on Titan 539**

Lammer, H., Tokano, T., Fischer, G., Stumptner, W., Molina-Cuberos, G.J., Schwingenschuh, K., Rucker, H.O. **Lightning activity on Titan: can Cassini detect it? 561**

Kömle, N.I., Ball, A.J., Kargl, G., Keller, T., Macher, W., Thiel, M., Stöcker, J., Rohe, C. — **Impact penetrometry on a comet nucleus – interpretation of laboratory data using penetration models 575**

Ebbing, J., Janle, P., Koulouris, J., Milkereit, B. — **3D gravity modelling of the Chicxulub impact structure 599**

Fechtig, H. — **Laboratory and space experiments for the exploration of the interplanetary dust Memories of the activities of the dust group of the MPI for Nuclear Physics during the years 1964 through 1994 611**

Marcano, V., Benitez, P., Palacios-Pru, E. — **An experimental approach to production of peptide-like compounds in the early terrestrial planets 617**

Geiswiller, J., Béghin, C., Kolesnikova, E., Lagoutte, D., Michau, J.L., Trotignon, J.G. — **Rosetta spacecraft influence on the mutual impedance probe frequency response in the long Debye length mode 633**

Leblanc, F., Johnson, R.E. — **Sputtering of the Martian atmosphere by solar wind pick-up ions 645**

JUNE

Riccioli, D., Blanco, C., Cigna, M. — **Rotational periods of asteroids II 657**

Encrenaz, Th., Coradini, A., Beaudin, G., Crovisier, J., Drossart, P., Erard, S., Germain, B., Gulkis, S., Langevin, Y., Lellouch, E. — **The Mars flyby of ROSETTA: an opportunity for infrared and microwave high-resolution sounding 673**

Tuzzolino, A.J., McKibben, R.B., Simpson, J.A., BenZvi, S., Voss, H.D., Gursky, H. — **The Space Dust (SPADUS) instrument aboard the Earth-orbiting ARGOS spacecraft: I–instrument description 689**

Tuzzolino, A.J., McKibben, R.B., Simpson, J.A., BenZvi, S., Voss, H.D., Gursky, H. — **The Space Dust (SPADUS) instrument aboard the Earth-orbiting ARGOS spacecraft: II–results from the first 16 months of flight 705**

Encrenaz, Th., Lellouch, E., Paubert, G., Gulkis, S. — **The water vapor vertical distribution on mars from millimeter transitions of HDO and $H_2^{18}O$ 731**

Watters, T.R., Konopliv, A.S. — **The topography and gravity of Mare Serenitatis: implications for subsidence of the mare surface 743**

Stankowski, W.T.J. — **The geology and morphology of the natural reserve "Meteoryt Morasko" 749**

Paul, A., Ray, S., DasGupta, A., Chandra, H. — **Radio Signatures of November 1998 Leonid Meteor on Transionospheric VHF Satellite Signal 755**

JULY

Special Issue

ASTEROIDS, METEORITES, IMPACTS AND THEIR CONSEQUENCES (AMICO 2000)

Jessberger, E.K., Albercht, R., Miller, H., Schieber, M. — **Editorial Introduction 761**

Ott, U. — **Presolar grains in meteorites: an overview and some implications 763**

Bischoff, A. **Meteorite classification and the definition of new chondrite classes as a result of successful meteorite search in hot and cold deserts 769**

Albrecht, R., Maitzen, H.-M., Schnell, A. **Early asteroid research in Austria 777**

Elst, E.W. **Are we approaching the end of asteroid-discovery? 781**

Müller, T.G. **Asteroids in the infrared–Serendipitous observations with ISO 787**

Vakhidov, A.A. **Asteroid orbits in mixed resonances: some numerical experiments 793**

Schäfer, W.A. **High-accuracy simulation of the motion of asteroids and comets Numerical aspects 799**

Dvorak, R., Freistetter, F. **Dynamical evolution and collisions of asteroids with the earth 803**

Bykova, L.E., Galushina, T.Yu. **Evolution of near-Earth asteroids close to mean motion resonances 811**

Keller, G. **The end-cretaceous mass extinction in the marine realm: year 2000 assessment 817**

Kramar, U., Stüben, D., Berner, Z., Stinnesbeck, W., Philipp, H., Keller, G. **Are Ir anomalies sufficient and unique indicators for cosmic events? 831**

Heide, K., Heide, G., Kloess, G. **Glass chemistry of tektites 839**

Hofmann, P., Leythaeuser, D., Schwark, L. **Organic matter from the Bunte Breccia of the Ries Crater, southern Germany: investigating possible thermal effects of the impact 845**

Stübig, M., Schäfer, G., Ho, T.-M., Srama, R., Grün, E. **Laboratory simulation improvements for hypervelocity micrometeorite impacts with a new dust particle source 853**

AUGUST

Stephan, T. **TOF-SIMS in cosmochemistry 859**

Capria, M.T., Coradini, A., De Sanctis, M.C., Blecka, M.I. **P/Wirtanen thermal evolution: effects due to the presence of an organic component in the refractory material 907**

Palomba, E., Poppe, T., Colangeli, L., Palumbo, P., Perrin, J.M., Bussoletti, E., Henning, Th. **The sticking efficiency of quartz crystals for cosmic sub-micron grain collection 919**

Miao, J., Stark, J.P.W. **Direct simulation of meteoroids and space debris flux on LDEF spacecraft surfaces 927**

Efroimsky, M. **Relaxation of wobbling asteroids and comets–theoretical problems, perspectives of experimental observation 937**

Hallan, P.P., Rana, N. **Effect of perturbations in coriolis and centrifugal forces on the location and stability of the equilibrium point in the Robe's circular restricted three body problem 957**

Ball, A.J., Gadomski, S., Banaszkiewicz, M., Spohn, T., Ahrens, T.J., Whyndham, M., Zarnecki, J.C. **An instrument for in situ comet nucleus surface density profile measurement by gamma ray attenuation 961**

Zasova, L., Grassi, D., Formisano, V., Maturilli, A. — **The Martian atmosphere in the region of the great volcanoes: Mariner 9 IRIS data revisited 977**

Dwivedi, A.K., Varma, P., Tiwari, M.S. — **Kinetic Alfve'n wave in the inhomogeneous magnetosphere and general distribution function 993**

AUGUST/SEPTEMBER

Special Issue

MAGNETOSPHERES OF THE OUTER PLANETS (PART II)

Russell, C.T. — **The dynamics of planetary magnetospheres 1005**

Marhavilas, P.K., Anagnostopoulos, G.C., Sarris, E.T. — **Periodic signals in Ulysses' energetic particle events upstream and downstream from the Jovian bow shock 1031**

Anagnostopoulos, G.C., Karanikola, I., Marhavilas, P. — **Large-scale energetic particle layers in the high latitude Jovian magnetosphere 1049**

Cowley, S.W.H., Bunce, E.J. — **Origin of the main auroral oval in Jupiter's coupled magnetosphere–ionosphere system 1067**

Bunce, E.J., Cowley, S.W.H. — **Divergence of the equatorial current in the dawn sector of Jupiter's magnetosphere: analysis of Pioneer and Voyager magnetic field data 1089**

Edwards, T.M., Bunce, E.J., Cowley, S.W.H. — **A note on the vector potential of Connerney et al.'s model of the equatorial current sheet in Jupiter's magnetosphere 1115**

Blanco-Cano, X., Russell, C.T., Huddleston, D.E., Strangeway, R.J. — **Ion cyclotron waves near Io 1125**

Zarka, P., Queinnec, J., Crary, F.J. — **Low-frequency limit of Jovian radio emissions and implications on source locations and Io plasma wake 1137**

Boudjada, M.Y., Galopeau, P.H.M., Rucker, H.O. — **Jovian hectometric beam observed by PWS and WAVES experiments on board Galileo and Wind spacecraft 1151**

Pallier, L., Prangé, R. — **More about the structure of the high latitude Jovian aurorae 1159**

OCTOBER

Special Issue

NONLINEAR DYNAMICS AND FRACTALS IN SPACE

Macek, W.M. — **Nonlinear dynamics and fractals in space 1175**

Anselmet, F., Antonia, R.A., Danaila, L. — **Turbulent flows and intermittency in laboratory experiments 1177**

Sorriso-Valvo, L., Carbone, V., Giuliani, P., Veltri, P., Bruno, R., Antoni, V., Martines, E. — **Intermittency in plasma turbulence 1193**

Bruno, R., Carbone, V., Veltri, P., Pietropaolo, E., Bavassano, B. — **Identifying intermittency events in the solar wind 1201**

Redaelli, S., Macek, W.M. — **Lyapunov exponent and entropy of the solar wind flow 1211**

Kovács, P., Carbone, V., Vörös, Z. — **Wavelet-based filtering of intermittent events from geomagnetic time-series 1219**

Watkins, N.W., Oughton, S., Freeman, M.P. — **What can we infer about the underlying physics from burst distributions observed in an RMHD simulation? 1233**

Baumgärtel, K. — **Fluid approach to mirror mode structures 1239**

NOVEMBER

Publisher's note — **Change of editorial offices 1249**

D'Angelo, N. — **Dust-acoustic waves in plasmas with opposite polarity grains 1251**

Sorasio, G., Mendis, D.A., Rosenberg, M. — **The role of thermionic emission in meteor physics 1257**

Krivov, A.V., Banaszkiewicz, M. — **Unusual origin, evolution and fate of icy ejecta from Hyperion 1265**

Jiang, X., Hu, J. — **High resolution Leonid meteor light curves: implied meteoroid structure 1281**

Krüger, H., Grün, E., Graps, A., Bindschadler, D., Dermott, S., Fechtig, H., Gustafson, B.A., Hamilton, D.P., Hanner, M.S., Horányi, M., Kissel, J., Lindblad, B.A., Linkert, D., Linkert, G., Mann, I., McDonnell, J.A.M., Morfill, G.E., Polanskey, C., Schwehm, G., Srama, R., Zook, H.A. — **One year of Galileo dust data from the Jovian system: 1996 1285**

Krüger, H., Grün, E., Landgraf, M., Dermott, S., Fechtig, H., Gustafson, B.A., Hamilton, D.P., Hanner, M.S., Horányi, M., Kissel, J., Lindblad, B.A., Linkert, D., Linkert, G., Mann, I., McDonnell, J.A.M., Morfill, G.E., Polanskey, C., Schwehm, G., Srama, R., Zook, H.A. — **Four years of Ulysses dust data: 1996–1999 1303**

Silva, A.M., Cellone, S.A. — **Cometary activity in 2060 Chiron at minimum brightness 1325**

Formisano, V., Grassi, D., Ignatiev, N.I., Zasova, L. — **IRIS Mariner 9 data revisited: water and dust daily cycles 1331**

Tejfel, V.G. — **Planetary research in Kazakhstan 1347**

Erkaev, N.V., Schaffenberger, W., Biernat, H.K., Farrugia, C.J., Vogl, D.F. — **Analysis of mirror modes convected from the bow shock to the magnetopause 1359**

McKenna-Lawlor, S., Kirsch, E., Heynderickx, D., Lemaire, J. — **Energetic particle data recorded onboard Giotto during the first encounter of an observing spacecraft coming from deep space with Planet Earth 1365**

Galopeau, P.H.M., Gérard, E. — **Variations of Jupiter's synchrotron radiation: a link with solar activity? 1379**

Book review: Sahal-Brechot, S. — **The Polarization of Light and Astronomical Observation Advances in Astronomy and Astrophysics Series, Vol. 4 J.-L. Leroy; Gordon and Breach Publishing, London, 226 pp., cloth 1393**

DECEMBER

Special Issue

RETURNS TO MERCURY

Grard, R., Balogh, A. — **Returns to Mercury: science and mission objectives 1395**

Anselmi, A., Scoon, G.E.N. — **BepiColombo, ESA's Mercury Cornerstone mission 1409**

Novara, M. — **The BepiColombo Mercury surface element 1421**

Racca, G.D. — **Capability of solar electric propulsion for planetary missions 1437**

Solomon, S.C., McNutt Jr., R.L., Gold, R.E., Acuña, M.H., Baker, D.N., Boynton, W.V., Chapman, C.R., Cheng, A.F., Gloeckler, G., Head III, J.W., Krimigis, S.M., McClintock, W.E., Murchie, S.L., Peale, S.J., Phillips, R.J., Robinson, M.S., Slavin, J.A., Smith, D.E., Strom, R.G., Trombka, J.I., Zuber, M.T. — **The MESSENGER mission to Mercury: scientific objectives and implementation 1445**

Gold, R.E., Solomon, S.C., McNutt Jr., R.L., Santo, A.G., Abshire, J.B., Acuña, M.H., Afzal, R.S., Anderson, B.J., Andrews, G.B., Bedini, P.D., Cain, J., Cheng, A.F., Evans, L.G., Feldman, W.C., Follas, R.B., Gloeckler, G., Goldsten, J.O., Hawkins III, S.E., Izenberg, N.R., Jaskulek, S.E., Ketchum, E.A., Lankton, M.R., Lohr, D.A., Mauk, B.H., McClintock, W.E., Murchie, S.L., Schlemm II, C.E., Smith, D.E., Starr, R.D., Zurbuchen, T.H. — **The MESSENGER mission to Mercury: scientific payload 1467**

Santo, A.G., Gold, R.E., McNutt Jr., R.L., Solomon, S.C., Ercol, C.J., Farquhar, R.W., Hartka, T.J., Jenkins, J.E., McAdams, J.V., Mosher, L.E., Persons, D.F., Artis, D.A., Bokulic, R.S., Conde, R. F., Dakermanji, G., Goss Jr., M.E., Haley, D.R., Heeres, K.J., Maurer, R. H., Moore, R.C., Rodberg, E. H., Stern, T.G., Wiley, S.R., Williams, B.G., Yen, C.-w.L., Peterson, M.R. — **The MESSENGER mission to Mercury: spacecraft and mission design 1481**

Mendillo, M., Warell, J., Limaye, S.S., Baumgardner, J., Sprague, A., Wilson, J.K. **Imaging the surface of Mercury using ground-based telescopes 1501**

Neukum, G., Oberst, J., Hoffmann, H., Wagner, R., Ivanov, B.A. **Geologic evolution and cratering history of Mercury 1507**

Watters, T.R., Cook, A.C., Robinson, M.S. **Large-scale lobate scarps in the southern hemisphere of Mercury 1523**

Warell, J., Limaye, S.S. **Properties of the Hermean regolith: I. Global regolith albedo variation at 200 km scale from multicolor CCD imaging 1531**

Grande, M., Dunkin, S.K., Kellett, B. **Opportunities for X-ray remote sensing at Mercury 1553**

Spohn, T., Sohl, F., Wieczerkowski, K., Conzelmann, V. **The interior structure of Mercury: what we know, what we expect from BepiColombo 1561**

Spohn, T., Ball, A.J., Seiferlin, K., Conzelmann, V., Hagermann, A., Kömle, N.I., Kargl, G. **A heat flow and physical properties package for the surface of Mercury 1571**

Milani, A., Rossi, A., Vokrouhlický, D., Villani, D., Bonanno, C. **Gravity field and rotation state of Mercury from the BepiColombo Radio Science Experiments 1579**

Iess, L., Boscagli, G. **Advanced radio science instrumentation for the mission BepiColombo to Mercury 1597**

Iafolla, V., Nozzoli, S. **Italian spring accelerometer (ISA) a high sensitive accelerometer for "BepiColombo" ESA CORNERSTONE 1609**

Burlaga, L.F. **Magnetic fields and plasmas in the inner heliosphere: Helios results 1619**

Sarantos, M., Reiff, P.H., Hill, T.W., Killen, R.M., Urquhart, A.L. **A B_x-interconnected magnetosphere model for Mercury 1629**

Giampieri, G., Balogh, A. **Modelling of magnetic field measurements at Mercury 1637**

Wurz, P., Blomberg, L. **Particle populations in Mercury's magnetosphere 1643**

Mildner, M., Wurz, P., Scherer, S., Zipperle, M., Altwegg, K., Bochsler, P., Benz, W., Balsiger, H. **Measurement of neutral atoms and ions in Mercury's exosphere 1655**

Orsini, S., Milillo, A., De Angelis, E., Di Lellis, A.M., Zanza, V., Livi, S. **Remote sensing of Mercury's magnetospheric plasma environment via energetic neutral atoms imaging 1659**

Lukyanov, A.V., Umnova, O., Barabash, S. **Energetic neutral atom imaging of Mercury's magnetosphere 1. Distribution of neutral particles in an axially symmetrical exosphere 1669**

Lukyanov, A.V., Barabash, S., Lundin, R., C:son Brandt, P. **Energetic neutral atom imaging of Mercury's magnetosphere 2. Distribution of energetic charged particles in a compact magnetosphere 1677**

Barabash, S., Lukyanov, A.V., C:son Brandt, P., Lundin, R. **Energetic neutral atom imaging of Mercury's magnetosphere 3. Simulated images and instrument requirements 1685**
